

Advance Mobile App Information

Combat Tanks

Instant split screen two player mayhem on a single iPad with a unique and highly functional interface

Launch Date: October 2013

Tier 3 (\$2.99 USD/AUD)

iPad

Games: Action / Strategy

Take control of your tank and enter the fray in the epic battle between red and blue. Battle it out in ten different maps on two different terrains, each with their own unique difficulties, traps, and hazards.

Equip your tank with powerful or tactical power ups, such as the homing missile, bouncing bomb, and shield, in order to out gun, out manoeuvre, or out play your opponent. Avoid the deadly homing missiles, plant mines to build a trap, cover your escape, or catch the enemy unawares, and use bouncing bombs to flush out a hiding opponent.

With no other game on the marketplace providing two player split screen combat in a single game space, Combat Tanks provides a unique experience for the iPad. With highly functional and effective touch screen controls, Combat Tanks provides comfortable two player combat on a single iPad.

Press assets, screenshots, and a video trailer with in game footage from an early build of Combat Tanks can be found at the website, <http://www.combattanks.com.au/>.

Audience: Especially suitable for people or families with only one iPad, Combat Tanks provides quick, hassle free, simultaneous combat matches for two players without any extra resources, such as additional iPads or iPhones/iPods.

About the Developer: An information technology and communications technology consultant by trade, with a masters degree in information systems security, this is Adrian Schuurmans' first commercially released game. Going in with a splash, Adrian started from the outset to provide a unique playing experience, with features he had never before seen on touch screen tablets.
